

# Markdown to PDF Generation

## Introduction

This document demonstrates **Markdown to PDF** conversion using Python.

### Features

- **Bold text** and *italic text*
- Bullet points and numbered lists
- Code blocks and inline code
- Tables and links

### Code Example

```
def hello_world():  
    print("Hello, World!")
```

### Table Example

Library	Purpose	Version
markdown	MD to HTML	3.5+
weasyprint	HTML to PDF	60.0+

### Numbered List

1. First item
2. Second item
3. Third item

### Links

Visit [Python.org](#) for more information.
